Says Renewed Business Confidence Awaits Tariff Reduction.

RAPID GERMAN EXPANSION

Expulsion of Standard Oil Company Touched On in Report.

One of the features of the annual report of the Deutsche Bank for the year of supervisors of the bank. He says: "In the United States the uncertainty

of domestic politics, despite excellent

crops, was an impediment to the progress of business, and in our opinion there will be no basis for renewed confidence in that and the Democratic majority which has risen into power have decided on the extent of the prospective tariff reduction." The violent effect of the Balkan war situation and its European political fears upon German finance is instanced by Mr. Hertz in the report in the statement that in two months, from Septhe excess of note issue of the Reichs-bank beyond the metallic reserve sud-

denly increased \$114,285,000. Mr. Hertz treats of the action of the German money and security markets during the troublesome financial times the country has recently passed through as follows:

as follows:
"It is gratifying to be able to repeat in
this connection the statement we made
last year when speaking of the time of
the Moroccan crisis, that the German
money and security market withstood the
severe test to which it was subjected by the political disturbance no less favora-ably than the leading markets abroad. It should be observed that during this period the German money market stood entirely upon its own resources. An alleviating influence was found in the fact that part of our payments to foreign coun-tries for the import of merchandise could be made by selling foreign and particularly American securities, which even per mitted the import of gold. This testifies again conclusively to the great advantages country owning an important amount of high grade foreign securities market-

As to the future in German commercial affairs, Mr. Hertz says after referring to building trade depression,

"The progress of the future in industry and trade depends solely upon the trend of general politics, and will be governed by the conditions of the money market. rove but slowly, even if the political difficulties are settled peaceably in accordance with the aims of the European Powers and the hopeful expectation of all nations.
